

Dr. Greg Moloney, Ophthalmologist

SMART Surface Laser Procedure

At Pacific Laser Eye Center, we employ the smart SMART Surface Laser Procedure, or SLP, to correct your glasses prescription. This is a no touch, no flap, form of laser correction, which typically takes 40 seconds per eye. We consider it to be the safest way for you to correct your glasses prescription, both now and in the future.

At Pacific Laser Eye Center, we employ the SMART Surface Laser Procedure, or SLP, to correct your vision. If you are considering laser refractive surgery, but are nervous or have reservations, you can be reassured. The SLP procedure is a no touch, no flap treatment that is the safest way to correct your glasses now and in the future.
